

RTC2702A	OBSERVE ENVIRONMENTAL WORK PRACTICES		
Number	RTC2702A	AQF Level	2

Purpose

This competency standard covers the process of observing and contributing to positive environmental work practices. It requires the ability to follow workplace directions and instructions, recognise basic environmental hazards and threats and communicate accurately with supervisors and workplace colleagues, and keep simple records. Observing environmental work practices requires awareness of relevant environmental legislation, policies and workplace/industry practices, approaches to improving environmental performance, and environmental issues (especially in regard to water catchments, air, noise, ecosystems, habitat, efficient use of resources, sustainability and waste minimisation).

MAPPING			
<i>The mapping information below details the relationship between the Competency Elements and the Learning Objects</i>			
All performance criteria are covered in the following learning object-			
Competency Reference	RTC2702A		
Related Learning Object	Environmental Responsibility in the Shearing Shed		Object No. 7
